

## PM – REORGANIZATION OF TOOL SHOPS

PROJECT OWNER: EDF

AREA : 300 m<sup>2</sup>

PROJECT : Study on various buildings of the La Hague community of communes

LOCALISATION : Saint-Paul-Trois-Châteaux (26)

DATE : 2016

The objective was to completely reorganise the tool shop located in a controlled area. Based on the digital model of the installations and a flow study, this project made it possible to size and optimise the tool storage facilities according to their frequency of use.

- Definition of shelving types (quantity, layout)
- Organisation of tooling locations
- Study the ergonomics of the warehouse workers' workstations
- Study the signage
- Production of the work specifications
- Assistance with site monitoring
