

Scaffolding inspection

Subject : Safety checkpoints before working on scaffolding.

Type of application : Virtual Reality Serious Game for PC + HTC Vive VR Headset

Objective:

The "Scaffolding Control" application enables you to learn how to check the compliance of scaffolding with "safety" regulations before use.

The learner reviews the scaffolding and must identify and correct any deficiencies present.

- Document compliance,
- Inspection of technical installation points,
- Verification of physical protections
- Control of signage,
- Etc
-
