

initiation machine tool boiler making

Subject : Metallurgy trades (boiler making, piping, welding, plan reading, etc.).

Type of application : Training tool, Serious game in Virtual Reality on PC+ Oculus QUEST.

Objective:

To learn the technical and manual basics of these trades in the workshop and on site.
The application allows you to work on multiple workstations, machine tools and equipment for each trade and offers MCQs on the various machines and establishes a score in real time according to the work performed.
